

## JUSTICE 4 NIGERIA

Justice 4 Nigeria is a coordinating network of Nigerian grassroots community representatives, the Nigerian diaspora, international and UK NGOs, campaign groups, legal and financial professionals and concerned individuals united in building a strategic alliance that ends Shell's decades-long abuse of Niger Delta communities and delivers justice for Nigeria.

**Our purpose is to hold Shell, and their enablers, accountable for their harms**, so that they prevent further pollution, clean and restore the environment to the standard before their operations began, pay compensation for harms experienced; historic, current and in the future.

In cooperation, solidarity and friendship, we work together to:

**Hold** Shell legally and publicly accountable for their historic and future oil and gas production responsibilities and harms in the Niger Delta.

**Amplify** the voices of Niger Delta local communities and claimants seeking clean-up of oil and gas pollution and compensation for Shell's harms.

**Call-out** Shell globally for their devastating role in the Niger Delta and insufficient plans for selling-off assets (divestment).

**Advocate** with those in power to ensure Shell conduct due diligence, adequately clean-up and pay for loss, damages and restoration.

**Champion** Niger Delta living heritage and communities' rights to life, livelihoods and work, health and education.

**Support** court cases against Shell group of companies to victory or settlement with Niger Delta communities.

**Celebrate** significant case resolutions and victories in unison around the world.

FOR NIGER DELTA COMMUNITIES
