

Dear [MP's name]

I am writing as your constituent and as a member of the Manchester Amnesty group to ask you how The Labour party (substitute for your MP's party) will respond to the evidence that weapons sold by the UK have been used by the Rapid Support Forces (RSF) in Sudan.

As detailed recently by Amnesty International (<https://www.amnesty.org.uk/press-releases/sudan-horrifying-reports-el-fasher-rsf-attacks-civilians>), there are reports from EL Fasher in Darfur of horrific attacks on civilians by the RSF. This is reminiscent of the genocide of non-Arab communities in Darfur committed two decades ago by the Janjaweed, the predecessor of the RSF.

UK-made components have been found in weapons used in the widespread killing of civilians. The UK sells weapons to the UAE even though it is known as a hub for arms diversion to Sudan and Libya.

Amnesty International has made a statement that “The Government must immediately suspend all arms to the UAE. It must also prove that, in light of this evidence, it has launched a full investigation into how this equipment ended up in Sudan, notified the UK company in line with its own enhanced military end-use controls and, taken firm, immediate action to stop this from happening again.”

What is your view on what the Government should do to prevent UK made weapons being used to commit war crimes and what action will you take to remedy this?

Yours sincerely

Please add your name, address and postcode so your MP knows you are their constituent.
