

## LESSON 3 WORKSHEET 3

### Creating an infographic

Use the information provided in the table below to produce an infographic which shows the correlation between child mortality and the wealth of a country. You can include as much or as little of the data provided as necessary, but you must include a key to explain your graph if necessary.

Country	Region	Under 5 mortality (2005)	Income per person (US\$) (2005)	Population (2005)
Peru	America	28	6,466	27,925,628
USA	America	8	41,674	295,734,134
UK	Europe	6	31,580	60,441,457
Sweden	Europe	3.6	31,995	9,001,774
Afghanistan	Middle East and North Africa	150.5	874	29,928,987
Qatar	Middle East and North Africa	10.2	68,696	863,051
Singapore	South Asia	3	41,479	4,425,720
Thailand	South Asia	15.1	6,869	64,185,502
Mongolia	East Asia and Pacific	43.9	2,643	2,791,272
Japan	East Asia and Pacific	3.8	30,290	127,417,244
Sierra Leone	Sub-Saharan Africa	201.5	790	5,867,426
Rwanda	Sub-Saharan Africa	127.8	813	8,440,820

#### SUCCESS CRITERIA

A successful infographic will show:

- information that is easy to interpret using the key and axis
- correlations that exist between data
- that different countries and geographic areas are disproportionately affected
- the factors that cause infant mortality.
